1.Title:Campus Lost and Found Portal

2.Project Statement

Losing items on campus is common. This platform allows students to post lost or found items and contact others who might have them. Admins moderate content to maintain platform quality.

3.Outcomes

- Campus-restricted lost and found listings.
- Matching engine to connect users.
- Admin content management.
- In-app messaging or chat for contact.
- Analytics and reporting for admins.

4.Modules to be Implemented

1. **Authentication and Role Management**
2. **Post Lost/Found Items**
3. **Auto-Matching & Search**
4. **Chat or Contact System**
5. **Admin Dashboard and Reporting**

5.Week-Wise Milestones

Milestone 1: Week 1

Authentication

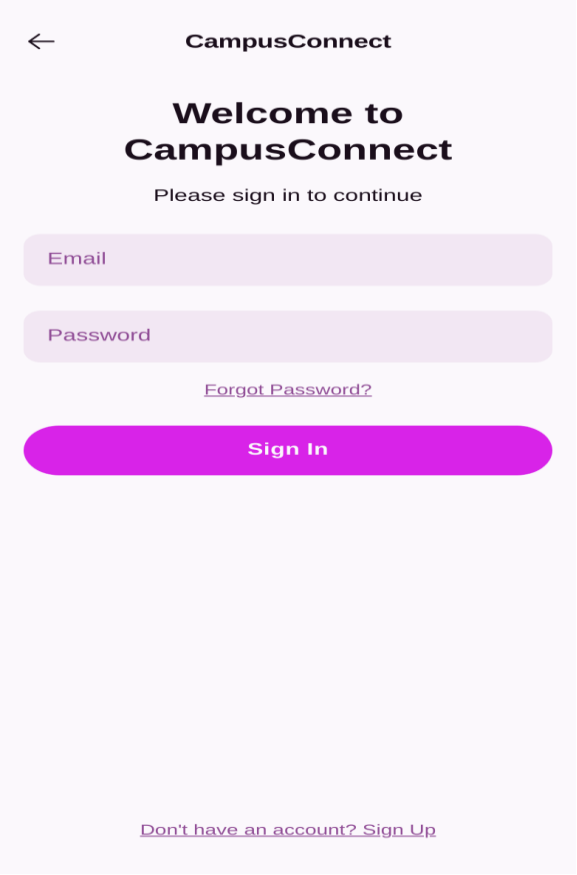
Implement login and registration with distinct user roles.

- Define roles: **Student** and **Admin**
- Use JWT-based authentication for session management

Campus Verification

Restrict platform access to verified campus members.

- Validate student emails using domain checks (e.g., @university.edu)
- Flag unverified accounts for admin review



Milestone 2: Weeks 2–3

Lost/Found Submission Form

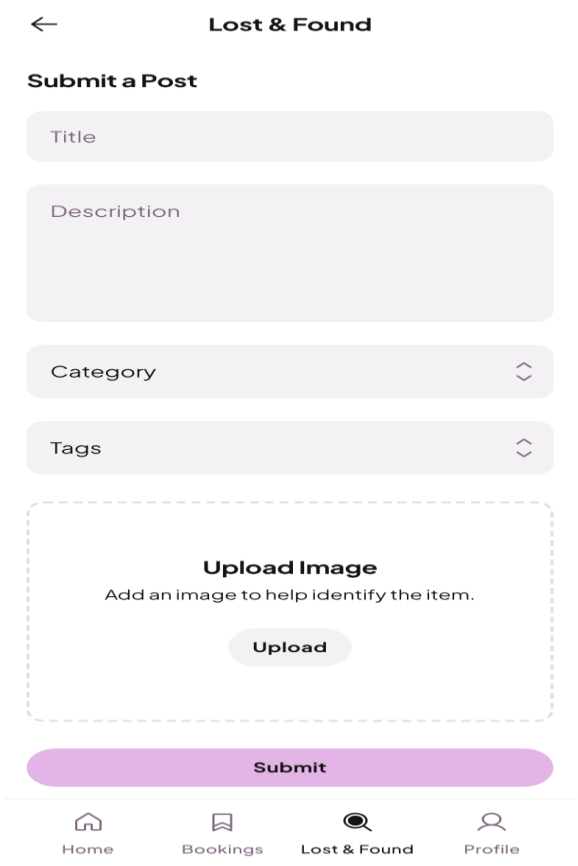
Allow users to report lost or found items using a structured form.

- Include fields for item name, description, date, and location
- Enable image upload to help with visual identification

Tags and Categories

Organize posts for easier filtering and searching.

- Add tags such as "electronics", "documents", "clothing", etc.
- Support category-based browsing on the main listing page



Milestone 3: Weeks 4–5

Matching Algorithm

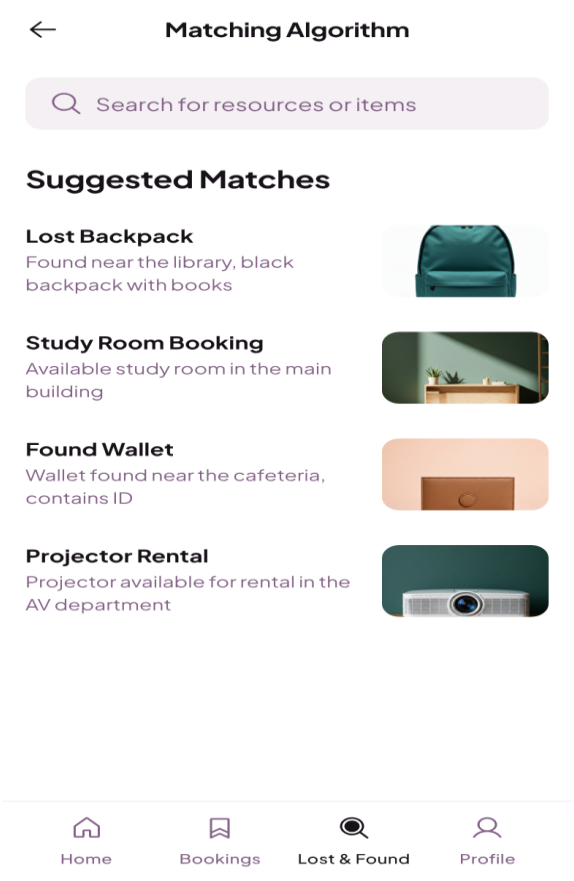
Automatically suggest potential matches between lost and found items.

- Use keyword similarity (e.g., item name, color, brand)
- Incorporate fuzzy matching for partial or misspelled entries

Location-Based Suggestions

Enhance match accuracy using item location data.

- Prioritize matches based on proximity of reported locations
- Allow users to filter results by campus zones or buildings



Milestone 4: Week 6

Chat Feature

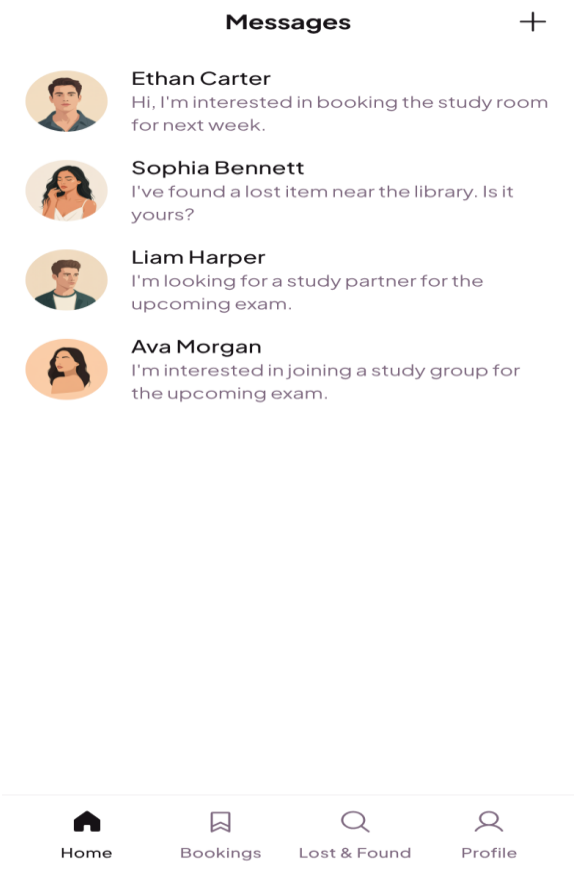
Enable users to communicate securely about lost/found items.

- Support basic in-app messaging between matched users
- Allow users to send and respond to contact requests

Privacy and Controls

Maintain user privacy during communication.

- Mask personal information (e.g., email, phone) unless shared voluntarily
- Allow users to block or report inappropriate messages



Milestone 5: Week 7

Admin Panel

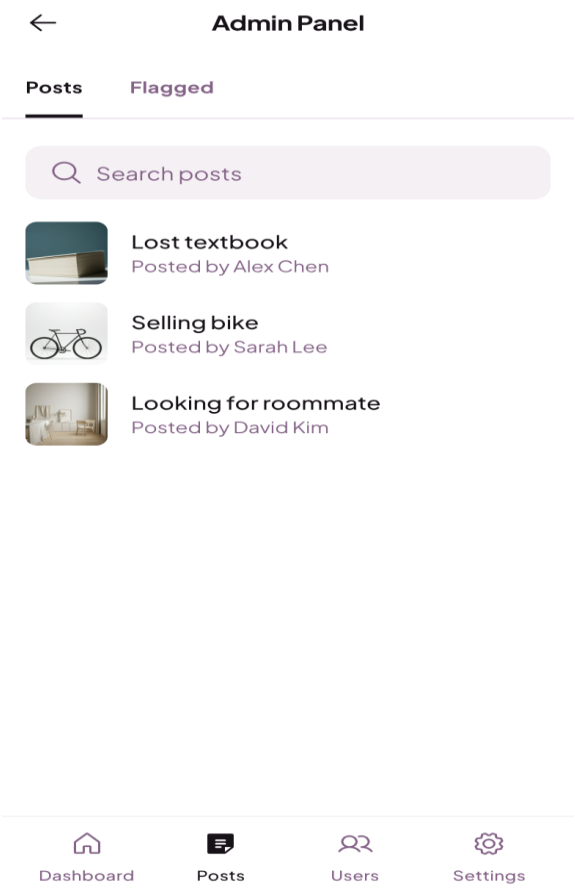
Provide administrators with tools to manage platform content.

- View all user-submitted lost/found posts
- Approve, edit, or delete inappropriate or duplicate entries

Flagged Content Moderation

Allow community reporting and admin review of flagged posts.

- Enable users to report suspicious or offensive content
- Admin reviews flagged items and takes necessary actions



Milestone 6: Week 8

Reporting Dashboard

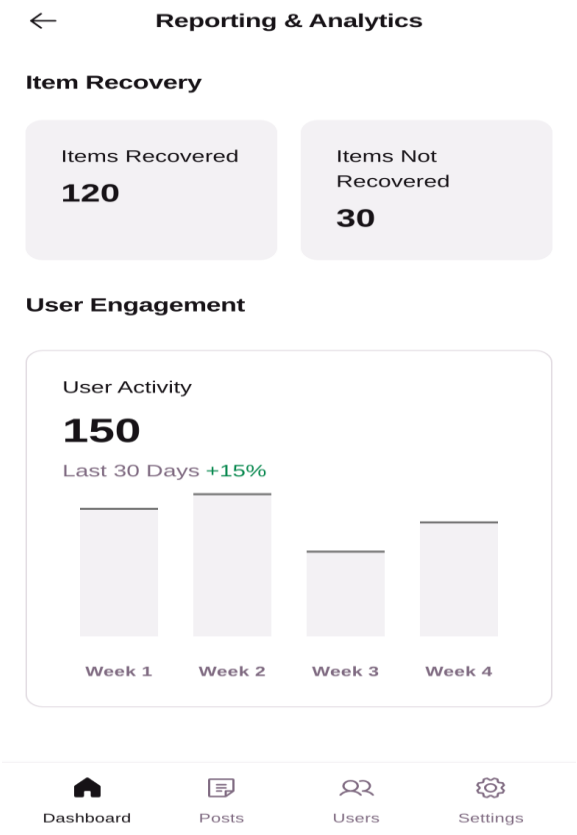
Generate insights on platform usage and outcomes.

- Track number of items reported, matched, and recovered
- Filter statistics by category, date, or location

User Engagement Metrics

Monitor user activity and interaction trends.

- Display metrics like active users, message volume, and post frequency
- Help admins assess platform effectiveness and growth



6.Evaluation Criteria

- Week 1: User login and role access validated.
- Week 3: Posting of items functional with categories.
- Week 5: Matching system tested.
- Week 6: Chat or contact working.
- Week 8: Admin functions and reports generated.
